

# Management of Exposures to Blood Borne Pathogens

**11 February to 24 March 2019**

A six week interactive, facilitated online course providing an overview of the management of needlestick and other exposures to blood and body substances that could potentially contain blood borne pathogens, such as hepatitis B, hepatitis C, or HIV.

## Topics covered include:

- Exposure prevention
- Rationale for exposure management
- Post-exposure management steps, including: risk assessment, prophylaxis, informed consent for testing, documentation, follow up
- Policy Development

**Who should attend?** Health care workers or managers involved in advising staff after an occupational exposure, managing exposures, or developing policy.

**Requirements:** Participants will need an email address and access to the internet and will be expected to spend approximately 3 hours per week for 6 weeks to complete the course. The course is counted as 2.5 days (or 18 hours) of study. For a few hours more the course can be graded and a "Certificate of Attainment" awarded. There will be no set time to be on-line but participants are expected to log in each week to complete activities at a time that suits them.

**Course Fees including GST:     \$385.00**
