

The ABCs of ARVs: HIV treatment for Pharmacists

17 February to 29 March 2020

This has been supported by an unrestricted grant from Gilead Sciences Pty Ltd

A six week interactive, facilitated online course providing an overview of current treatment issues in the management of HIV infection and disease.

Learning outcomes:

It is anticipated that on completion of the course participants will be able to:

Discuss key aspects of HIV disease and its management

Discuss the medicines used in treating HIV infections, including their modes of action, dosing consideration, how to manage interactions, adverse events and required clinical monitoring

Appropriately dispense medications to HIV positive patients and clients

Discuss the social, personal and emotional aspects of HIV that are important to deliver patient centred care in managing HIV patients and clients

Provide patient/client education on the optimal use of medications related to HIV infection

Who should attend? Community or hospital pharmacists with HIV patients

Requirements: Participants will need an email address and access to the internet and will be expected to spend approximately 3 hours per week for 6 weeks to complete the course. There will be no set time to be on-line but participants are expected to log in each week to complete activities at a time that suits them.

Accreditation number: CX19078

This activity has been accredited for 18 hours of Group 1 CPD (or 18 CPD credits) suitable for inclusion in an individual pharmacist's CPD plan, which can be converted to 18 hours of Group 2 CPD (36 CPD credits)
