The Albion Centre – Working towards the virtual elimination of HIV transmission and the elimination of Hepatitis C as a public health threat by 2030

Learning outcomes:

- Understand the definitions and terminology commonly used in transgender health
- Gain awareness and have the opportunity to discuss identity, personal journey, issues with accessing or using health care with a community member
- Explain the biopsychosocial aspects of transgender care and incorporate this into standard health care provision within a service
- Recognise the transgender specific health needs (hormone provision, fertility and mental health issues, sexuality and sexual function)
- Identify and gain confidence in Sexual health and HIV specific needs for the TGD community.
- Apply the newly acquired knowledge, language and skills for providing care to the TGD community in case studies

Programme:

Introductions
Trans 101 – definitions, terminology, language and identity.
Consumer – transgender speaker discussing identity, personal journey, issues with accessing and using health care
Transitioning – medical and psychosocial issues
